

RYAN DON JAMILOSA

Legazpi City, Philippines | jamilosa.com | ryandonjamilosa2@gmail.com

TECHNICAL SKILLS

- SIEM & Threat Detection:** Wazuh SIEM, Log Aggregation & Correlation, Threat Hunting, Alert Triage, MITRE ATT&CK Framework, Custom Rule Engineering.
- Endpoint Investigation & Basic DFIR:** Windows Sysmon, PowerShell Script Block Logging, Linux auditd, Process Tree Analysis, Digital Forensics & Incident Response (DFIR).
- Networking & Network Security:** TCP/IP Protocols, Network Configurations & Routing, Network Traffic Analysis (Nmap, tcpdump), Stateful Firewalls (nftables), VPNs, DNS Sinkholing.
- Databases & Analytics:** SQL, Google BigQuery, Relational Database Management, Data Normalization, Advanced Excel, Data Aggregation.
- IT Support & Systems Admin:** Windows Server & Active Directory (IAM, Folder Redirection), Linux/Windows OS Installation, Driver & Application Management.
- Hardware & Troubleshooting:** PC Assembly/Disassembly, Hardware Diagnostics, Peripheral Troubleshooting, Physical Cabling.

TECHNICAL PROJECTS

Comprehensive lab documentations and case studies available at jamilosa.com

Simulated Incident Analysis & DNS Exfiltration Investigation

Sep 2026

- Investigated a simulated multi-stage in-memory attack on a Windows endpoint, tracing attack execution chain from initial phishing lure to data exfiltration.
- Correlated Wazuh SIEM telemetry with Sysmon Event IDs (Process Create 1, File Create 11, File Delete 23) and PowerShell Script Block Logging (4104) to reconstruct the execution chain.
- Mapped the complete attack lifecycle to the MITRE ATT&CK framework's tactics and techniques.

Cloud Data Analytics & Behavioral Segmentation

Aug 2026

- Processed and analyzed large-scale datasets using SQL in Google BigQuery, performing data cleaning, normalization, transformation, and complex table joins.
- Engineered interactive data visualizations and dashboards to aggregate telemetry, translating raw metrics into actionable operational insights.

Secure Cloud Network & Site-to-Site VPN Integration

Jun 2026

- Implemented an encrypted site-to-site WireGuard VPN tunnel bridging an on-premise Linux Firewall to an AWS cloud environment establishing a secure connection between remote location.
- Configured with strict host firewall policies, network address translation (NAT), and AWS Security Groups.

EXPERIENCE

Department of Human Settlements and Urban Development (DHSUD – RO5) | Intern

Sep 2025 – Mar 2026

- Developed a PHP-based Asset Tracking System (ATS) enforcing strict Role-Based Access Control (RBAC) to track hardware lifecycles and chain-of-custody.
- Architected an audit logging system for the ATS utilizing RFC 5424 syslog and before-and-after JSON snapshots to support security accountability.
- Performed hardware diagnostics, resolved physical network connectivity issues, and managed OS/software deployments across office workstations.
- Supported digital transformation initiatives by scanning, organizing, and digitizing physical client documentation.

EDUCATION AND TRAINING

Junior Cybersecurity Analyst Career Path | NetAcad (Cisco)

Aug 2024

Specialized Cybersecurity & Cloud Training | Coursera (IBM, Google Cloud, EC-Council)

Dec 2024

Google Data Analytics Professional Certificate | Coursera (Google)

Sep 2026

BS Computer Science | Computer Arts and Technological College, Inc.

2026
